COLORADO COLLEGE ALMA MATER

(O Colorado College Fair)
Words and music written in 1953 by Charles Hawley '54 and
Professors Earl Juhas and Albert Seay

O Colorado College fair,
We sing our praise to you;
Eternal as the Rockies,
that form our western view;
Your loyal sons and daughters
will always grateful be;
The college dear to all of our hearts
is our C.C.

O Colorado College fair,
Long may your fame be known;
May fortune smile upon you,
and honor be your own;
Our Alma Mater always,
Your loyal children we;
Together let us face the future,
Hail C.C.

AMERICA, THE BEAUTIFUL

(O Beautiful for Spacious Skies)
Music written by Samuel A. Ward (1847–1903)
Words written by Katherine Lee Bates (1859–1929)
(Selected Verses)

O beautiful for spacious skies,
For amber waves of grain,
For purple mountain majesties
Above the fruited plain.
America! America!
God shed His grace on thee,
And crown thy good with brotherhood
From sea to shining sea.

O beautiful for pilgrim feet
Whose stern impassioned stress
A thoroughfare for freedom beat
Across the wilderness.
America! America!
God mend thine every flaw,
Confirm thy soul in self-control,
Thy liberty in law.

GRETCHEN CRYER

THE THEATRE AWARDS won by the collaborative team consisting of Gretchen Cryer and Nancy Ford are almost too numerous to list. Best known for writing the book and starring in “I’m Getting My Act Together and Taking It On the Road” (1978), Gretchen Cryer has taken musical theatre to a level of personal honesty and authenticity rarely found in a genre that is more often noted for its superficial entertainment value. From the height of her many successes, but with characteristic gentleness and modesty, she has taken many Colorado College students on a life-changing path in her course, “Writing for Solo Performance,” offered here since 2003. It is out of genuine respect and love that students have sought an honorary degree for her today.

Gretchen Cryer began her career while still an undergraduate at DePauw University. There she met Nancy Ford and began writing for theater. After graduation (Phi Beta Kappa), she continued her studies in the M.A.T. program at Harvard. As it turned out, Nancy also moved to Boston, and their collaboration in theater naturally followed.

With Gretchen responsible for writing the book and lyrics (often performing the major roles as well), Nancy supplied the music.

In addition to “I’m Getting My Act Together and Taking It on the Road,” (which won the Joseph Jefferson Award for the Best Musical in Chicago, with Gretchen winning the Best Actress Award, and the cast album winning a Grammy nomination), their numerous successes include “Now Is the Time for All Good Men” (Theater de Lys, 1967), “The Last Sweet Days of Isaac” (East Side Playhouse, 1970, which won the Obie Award as Best Musical and the Drama Desk Award), “Shelter” (Golden Theatre, 1973), “Hang On to the Good Times” (Manhattan Theater Club, 1985), “The Fabulous Party” (Williamstown Theater Festival, 1986), and “The American Girls Revue” (Chicago, 1998), “Circle of Friends” (Chicago 2001), with more from the “American Girl” series opening recently in NY and LA.

Gretchen’s new play “Changing” is a serious and often sadly funny play about changing identities, with its protagonist arriving at his/her 25th college reunion after having undergone a sex change. The unraveling of gender identities among the character “Bob-ra/Barbara’s” old football buddies reveals one of Gretchen’s primary interests. In talking about her work, she says “it’s the things that get under my skin that I want to write about, the shifting identities of women, the definitions of self, what it means to be a woman — all are changing so radically.” Here it must be said that Cryer’s attention to what gets “under her skin” has a way of catching the pulse of our culture before most of us even notice a heart is beating. From changing identities (sexual or otherwise) to the imaginative terror of a virtual life lived through technology examined in “The Last Sweet Days of Isaac” from 1970, Gretchen Cryer has created a body of work that both predicts and comments upon the dilemmas we face as a culture. And now, through her teaching, she is creating a new generation of writers to do the same.

It is a great honor for those of us in the drama/dance department to share in presenting the degree of doctor of humane letters, *honoris causa*, to “one of our very own.”

— Peggy Berg

J. DONALD HANEY '33, ESQ.

J. DONALD HANEY has had a distinguished career as an attorney and a man of service to his community, including most notably his alma mater, Colorado College. He graduated from CC with a B.A. in political science in 1933. After six months playing professional sax in a dance band in Chicago, and finding himself as college graduates are wont to do, he went to the law school at the University of Colorado, where he completed his legal training in 1937. He immediately joined his father’s two-person firm, then known as Haney & Jackson, increasing its size by 50 percent! Mr. Haney’s success with this firm, later known as Spurgeon, Haney & Howbert, can be measured by its phenomenal growth. At the time of its merger with Holland & Hart in 1986, the firm had grown from three lawyers to 172 and was recognized as one of the largest and most successful firms in the Rocky Mountain region.

We honor Mr. Haney today for more than his career as an attorney, however, for he dedicated himself to a life of service to those less fortunate than himself. When he and his wife became parents to Steve, born developmentally disabled, he began to dedicate his service to the care for people like his own son. He was a founding member of many organizations in the region that serve the disabled, including the Rocky Mountain Rehabilitation Center, the El Paso County Association for Retarded Citizens, Inc., the Boy’s Club Association of Colorado Springs, and the Health Association of the Pikes Peak Region. In addition, he served on the boards of Colorado State Health Facilities Advisory Council, and the Advisory Committee of Martin Luther Homes of Colorado Springs. He was selected by the national Martin Luther Home Society to be Person of the Year in 1997, a national recognition that has also been received by James Brady (former White House press secretary) and Ginny Thornburgh of the National Disabilities Organization.

We are, of course, especially grateful for his service to Colorado College. Like his father before him, Don was generous in providing *pro bono* legal work for the college from time to time, and after that time provided special service on an assessment team for CC President General William Gill (1949–55) in an attempt to rebuild the college and redefine its educational priorities in the post-war years. He has served as president of the National Alumni Association and on CC’s Estate Planning Council. And he has been continually active as the legacy representative for his class of 1933. In 1993, he received the Lloyd E. Worner Award for professional achievements. Incidentally, as a student he served the college as a cheerleader and by working in the grounds crew for 35 cents per hour.

Don is part of a true CC legacy family. His father, John T. Haney, although not a graduate, served the college as legal counsel for many years and was awarded an honorary doctorate in 1948. His wife of 54 years, Gratia Belle Blackman, graduated in 1934, and his sons John and Jeffrey in 1962 and 1976 respectively. For his distinguished professional career and for his service to his fellow human beings in a rich variety of ways, it is a pleasure and a privilege to nominate J. Donald Haney for the degree doctor of laws, *honoris causa*.

— Michael Grace

GINO STRADA

RAISED IN POST-WORLD WAR II MILAN, Gino Strada recalls his father's stories of a nearby school where 194 children and teachers died in an aerial bombing. In that war, half of all casualties were non-combatants. In today's wars, the percentage frequently reaches 90 percent. Children make up approximately a third of these casualties. Dr. Strada enters conflict zones to provide surgical care to the non-combatant wounded. He also militates against the ethos that makes "wars of choice" possible.

Dr. Strada studied emergency surgery at Milan University Medical School. From 1978 to 1988, he worked in hospitals in Italy, South Africa, the United Kingdom, and the United States. He became particularly skilled in heart and heart-lung transplants.

In 1988, Dr. Strada joined the International Committee of the Red Cross to provide surgical assistance and medical care to war victims, often in active combat zones. The following five years took him to Pakistan, Ethiopia, Thailand, Peru, Afghanistan, Somalia, and Bosnia.

Dr. Strada's work with the Red Cross inspired him to conceive of a new type of humanitarian organization: a small, flexible and specialized surgery team moving swiftly to deliver emergency care at conflict flash points around the globe. Acting on his vision, Dr. Strada and others founded Emergency in spring 1994. By mid-summer, Emergency had begun operations in an abandoned maternity hospital in Kigali, Rwanda.

In 1995, Dr. Strada began providing care in Iraqi Kurdistan. He established Emergency's first hospital there a year later. Additional hospitals followed as did dozens of first aid posts set up near front lines or in land mine hotspots. Emergency also established centers for prostheses and rehabilitation. Today, Emergency's operations extend to Afghanistan, Cambodia, Iraq, Sierra Leone, Sri Lanka, Sudan, and other locations. By its most recent count, Emergency has provided assistance and care to 1.8 million people. Emergency frequently turns over its facilities to local officials once local capacity re-emerges.

Dr. Strada seeks to eliminate the sources of conflict-related casualties through educational outreach. His bestselling 1999 book, "Green Parrots: A War Surgeon's Diary," takes its name from the green, winged anti-personnel mines designed to resemble children's toys. Green parrots are manufactured in Russia, but they symbolize a global plague of weapons almost entirely produced in the "developed" world. One brief anecdote in "Green Parrot" tells us about the Italian mine that destroyed the legs of a nine-year-old Iraqi girl and killed her mother and sister. Fiercely competing with other arms exporters, Italian companies provided this and millions of additional mines to both sides in the Iran-Iraq war. Tragically for 1,000's of maimed children and adults, mines do not disappear after the ceasefire.

As Dr. Strada and his colleagues encountered the devastating effect of mines in Iraq, Cambodia, Afghanistan, and elsewhere, they reminded people in Italy that they could do something about it. In 1997, Emergency mailed over one million postcards to Italian voters — each bearing the picture of a child mutilated by a land mine. This campaign contributed to the Italian Parliament's 1997 vote to ban domestic production and trade in landmines. Dr. Strada is today a vocal critic of the United States' continuing refusal to sign the 1997 Landmine Ban Treaty (Ottawa Convention).

According to New York Times film critic A.O. Scott, Dr. Strada practices "humanism without borders and without illusions." An anti-Machiavellian who discounts most rationale for "just wars," Strada instructs us to "Stop thinking of war and killing [as a] means to solve ... problems." He knows from experience that "collateral damage" is never "accidental." War guarantees the destruction of innocent lives. Condoning even a small number of deaths in order to serve the "civic good" is not "virtue," it is a small contribution to premeditated murder. We must stop doing it.

— John A. Gould

MELODY S. BABBITT

WE ARE ALL FAMILIAR WITH Martin Luther King, Jr.'s assertion that the measure of a society's greatness is in how it treats its most vulnerable members. The astonishing scope of compassion, service, and effectiveness represented in the life and work of Melody Babbitt compels us to extend this observation to the individual: The magnitude of her contribution is best measured by the vulnerability of the people she strives to benefit.

Caseworker, employment advisor, crisis intervention counselor, special needs advocate, job developer, resource advisor, facilitator, transportation coordinator, teachers' aide, mentor — no list, no matter how exhaustive, quite captures the many roles Melody Babbitt has played over the last 25 years through her work at Rocky Mountain Service, Employment and Redevelopment, and a host of other organizations. In her work with clients with disabilities seeking employment, Ms. Babbitt does not stop at counseling and providing referrals; rather, she can be found helping them prepare for interviews, escorting them to appointments, as well as debriefing and following up afterward. She volunteers for "extra" assignments, including Feed the Children, Toys for Tots, Business Networking International, and Dress for Success. She not only signs and interprets fluently for her deaf clients, but finds time to teach sign language classes herself.

Melody Babbitt's commitment extends to those disadvantaged in part by their own actions. In working with felons and perpetrators of domestic violence, she repeatedly demonstrates the power of reform and conflict resolution at a time when our society is all too willing to discard such individuals. She is known in the El Paso County community for taking on the toughest cases, persevering through obstacles, and maintaining hope and good spirits, all consistently aimed toward the building of community by prioritizing those most downtrodden and broken.

Melody Babbitt possesses the very qualities educators seek to instill through liberal arts education: a voraciousness for learning; the ability to recognize opportunity and the inability to pass it by; flexibility and adaptiveness; and expansiveness of intellect, feeling, and character. Because she so remarkably demonstrates the power of what we hope to convey on her own, Colorado College is gratified for the opportunity to present Melody Babbitt with the degree of bachelor of arts, *honoris causa*.

THE COLORADO COLLEGE

WHEN A FEW brave and visionary men determined in 1874 to found a college in the shadow of the Rocky Mountains, Colorado was not yet a state; in fact, it was little more than an inhospitable frontier. Nonetheless, on February 4, 1874, the Board of Trustees adopted a charter establishing "The Colorado College," and stating that the board's purpose was "to locate and maintain at Colorado Springs under Christian auspices an Institution of Learning on the college or university plan."

The college officially began with 12 students and two instructors meeting in a three-room frame building in the 200 block of North Tejon Street. Student assemblies and daily prayer meetings were held in the Cumberland Presbyterian Church next door.

But the institution's stability was far from assured. In fact, the college's first president, the Reverend James G. Dougherty, said, "The trustees looked around for someone who had wit enough to see the fading possibilities of a college and not wit enough to perceive the great hindrances to success."

In fact, the hindrances turned out to be considerable. When there was not enough money for the president's salary, Dougherty resigned, and within weeks, a large party of Ute Indians, en route from their mountain reservation to a buffalo hunt, were encamped on the four-block square that had been set aside for the campus.

The setback, however, was only temporary. In 1876, Edward Payson Tenney was offered the presidency of the "suspended" college, on the condition that he be responsible for raising the money to cover all operational and instructional expenses of the institution and not "place trustees of the college under any financial obligation." In his book on the history of the college, former Dean of Men J. Juan Reid writes that when Tenney received the invitation from the college to be its president, he retired "deep into the Cape Anne woodlands near his Massachusetts home to pray for divine guidance and specifically, that Henry Cutler, a well-to-do deacon of his church, might become the divine instrument for putting new life into Colorado College." Apparently, Tenney's prayers were answered because Cutler consulted with officials of the American College and Education Society, and he and four other Congregationalists from the Boston area agreed to finance the operational expenses of the college for one term on a trial basis.

In September 1876, the college reopened with 30 students and then embarked on a campaign to raise funds for the construction of a permanent college building.

General William Jackson Palmer, founder of Colorado Springs and a trustee of the college, spoke at the groundbreaking for the new building on July 4, 1877. "In breaking this ground," he said, "let us set apart and forever devote it and the structure which is to rest upon it to the purposes of education, in the most unsectarian way, to the discovery and inculcation of the truth."

From that day forward, the college had a permanent home. The building was dedicated at the college's first commencement on May 31, 1882. On that day, two graduates received their degrees, Parker Halleck and Fredrick Tuckerman, and they were both required to give orations to the assembled gathering. After they had finished speaking about civil service reform and "A Popular View of Philosophy," President Tenney delivered a commencement address that lasted an hour and fifteen minutes.

Halcyon days followed. On April 12, 1883, in the first intercollegiate football game played west of the Mississippi, the college team defeated the team from the University of Denver 12-0. Following the game, Denver University accused the college of using "ringers," and the college admitted that they had played five of the best players of the Crowell Hose Company, one of the local volunteer fire departments.

In the years that followed, the college continued to expand, and buildings of peachblow sandstone grew up and formed the quadrangle. The same clear vision that went into creating the college was evident again when it became necessary to preserve the campus. William F. Slocum, the college's third president, refused to allow a local streetcar company to run its cars through the campus and insisted that the new science building be erected at the end of Tejon Street. When the City Council sided with Slocum, the owner of the streetcar company diverted what is said to have been "a substantial sum of money," once intended for the college, to other far less worthy purposes.

The more than 1,930 students currently enrolled at Colorado College are taught by 168 distinguished faculty members. The college's commitment to liberal arts and sciences education has remained steadfast since its founding in 1874, enhanced by a distinctive curriculum organization called the Block Plan. The college's twelfth president, Richard F. Celeste, presides over today's ceremonies.

General Palmer's vision of a school dedicated to "the discovery and inculcation of the truth" is in good hands.

A NOTE ON ACADEMIC COSTUME

THE ACADEMIC COSTUME worn by faculty gives commencement much of its traditional air of pageantry. With its long, flowing gown and brightly colored hood, the costume would seem to have been designed for just this purpose. In fact, academic costume was designed in the Middle Ages, when all students were clerics, with much more practical considerations in mind. The gown and its attached hood helped to keep off the chill in the unheated buildings of the day. Even the bright linings of the hood were chosen with the purpose of identifying the religious order to which the student belonged.

To the knowledgeable observer, American academic costume today can be just as informative about its wearer as it was in the Middle Ages. Based on the intercollegiate code established in 1895, each aspect of the costume, such as gown color, mortar-board tassel, and sleeve shape, indicates something about its wearer and the highest degree received.

The gown is usually black, although some universities have adopted a brighter color scheme. The color of the tassel can indicate the highest degree the wearer has earned; a doctor's cap, for instance, frequently bears a tassel of gold. The sleeves are even more informative, with long pointed sleeves indicating the holder of a bachelor's degree; oblong sleeves, a master's degree; and bell-shaped sleeves, a doctor or specialist. The doctor can be distinguished from the specialist by the three bars that adorn the sleeves of the gown.

With its brightly colored lining, the hood is the outstanding feature of the academic costume. The color of the lining indicates the college or university that has granted the degree — Colorado College hoods, for instance, are lined in gold. Each hood bears a border whose color is determined by the degree the wearer has earned. So, a doctor of philosophy's hood will always have a border of blue, regardless of the field studied.

Among the institutional colors that may be seen at today's commencement are the following: University of Alaska, gold, violet chevron; Arizona State University, maroon, gold chevron; Bryn Mawr College, gold, white chevron; University of California, gold, blue chevron; University of Chicago, maroon; University of Colorado, gold, silver gray chevron; Columbia University, light blue, white chevron; University of Connecticut, royal blue and white; Cornell University, red, two white chevrons; Dartmouth College, Dartmouth green; Duke University, royal blue and white; Harvard University, crimson; University of Illinois, dark blue, two orange chevrons; Indiana University, crimson, white chevron; Johns Hopkins University, dark blue, gold chevron; University of Kansas, red, blue chevron; University of London, maroon, gold chevron; University of Maryland, black, gold chevron; University of Michigan, maize, azure blue chevron; Massachusetts Institute of Technology, bright red, silver gray chevron; Northwestern University, purple, gold chevron; University of Notre Dame, gold, royal blue chevron; University of Oregon, gold, green chevron; University of Pennsylvania, cardinal, blue chevron; Princeton University, orange, black chevron; University of Rochester, gold and blue; Stanford University, cardinal; University of Toronto, scarlet, two white cords; University of Virginia, blue, orange chevron; University of Wisconsin, bright red; Yale University, dark blue.
